

Executive Summary

2018-19 Comprehensive Settlement Agreement Annual Report

The Comprehensive Settlement Agreement Annual Report for 2018-19 (Report) provides information for the public on the implementation and/or completion of various sections of the Settlement Agreement between the City of Santa Cruz, County of Santa Cruz, Coalition for Limiting University Expansion, Rural Bonny Doon Association, individual citizens and The Regents of the University of California, and University of California Santa Cruz campus.

The Comprehensive Settlement Agreement (CSA) signed in August 2008 set the course for a new relationship between the parties. The City and the University have responded positively to the CSA provisions by meeting and talking regularly to achieve agreed upon goals, reducing use of resources and generally collaborating on projects for the betterment of the welfare of our community. Despite budget constraints facing all of the public agencies, progress has been made and all areas are in compliance.

In the 11th year of implementation of the CSA, several benchmarks were achieved. Here are some of the highlights:

- Main campus average daily trips (ADT) at 23,271 remains well below the 28,700 not to exceed threshold.
- Beginning in 2018, UCSC and METRO partnered on deploying three, 60-foot articulated buses onto campus routes to provide increased capacity for our students, faculty, staff and guests. This year, up to four of these articulated buses will be deployed onto campus routes provide even greater capacity during the regular school term.
- 60.9% of trips used alternative modes of transportation through increased transportation demand management programs, such as public transit and ridesharing.
- For 2018-2019, UC Santa Cruz provided 9,283 beds, which is 1,323 beds in excess of the required 7,960 in the Comprehensive Settlement Agreement.
- Using 167.1 million gallons per year (calendar year) in 2018, the campus remains far below the 206 (MGY) base usage in the Comprehensive Settlement Agreement. In fact, water usage has remained less than 206 MGY consistently over the last 11 reporting years.

The Report includes relevant data associated with the identified CSA sections. Each section in the report has a website link to the pertinent section (and complete text) of the signed settlement agreement. Notes have been included on the right side of the Report to clarify the data.
